

Change management

Clients Portal : servlets, visualisations and manual downloads will close.

The Clients portal will give place to 2 new offers already massively used by our customers.

1. Access to "open" data

* Servlets are programs, helping to build applications generating dynamic web pages (HTML, XML). They are web links integrated in applications to get data. But the technology is obsolete, and replaced by APIs.

2. Matching list between old and new offer

Old Offer Clients Portal

New Offer Data and Services Portals

Data on Clients Portal	Servlets	Open API Data Portal	Vizualisations and manual downloads Portail Services
Forecast for the next day / D+2	downloadPConso	Consumption • short_term	Consumption forecast
Installed capacity of units	ParcRefServletV3 CodesEICServlet	Generation installed capacities • capacities_per_production_type • capacities_per_production_unit	Installed capacity of units above 1 MW, aggregated per production type
Generation forecast for the next day	PrevProdServlet EolienServlet PrevProdSolaireServlet	Generation forecast • forecast	Generation forecast
Actual generation per unit	ProdGroupeServlet	Actual generation • actual_generations_per_unit	Generation achieved by unit
Actual generation per production type	ParcRefServletV3	Actual generation • actual_generations_per_production_type	Generated power aggregated by sector
Balance Responsible Entity Reconstitution flows : • National reference load curve • National alignment coefficient • National Profiling Imbalance of day • National Residual load curve	ReconstitutionFluxServlet	Bre imbalance reconstitution • national_reference_load_curves • national_profiling_imbalances • additional_national_alignment_coefficients Bre temporal reconciliation • temporal_reconciliations	Balance responsible party system
Water reserves	SHServlet	Actual generation • water_reserves	Hydraulic stock
Daily load curves	-	Consumption • Short_term	Daily load curves
Year ahead margins forecasts	/MpaServlet	Consumption • annual_forecasts	Consumption forecast See "Year ahead forecast margin" tab
Unavailability of generation resources	/IndispoProdServlet	Unavailability additional information • generation_unavailabilities	Downtime of generation resources
